ARUN S ADIGA

Summary

I'm a dedicated junior web developer on a mission to translate ideas into captivating digital experiences. Proficient in HTML, CSS, and JavaScript, with hands-on experience in React.js and Node.js, I specialize in crafting responsive and user-friendly interfaces. I have actively contributed to projects like discord clone where I demonstrated my ability to integrate my front end code with the back end. As a continuous learner, I constantly improve my knowledge of the latest industry trends and technologies, while my collaborative nature and effective communication skills make me an asset to any dynamic team. Let's connect and explore how my passion for coding can contribute to your projects!

Projects

E-commerce (E-Shop) App built with NextJS

E-commerce app made with Next 13, Sanity and Stripe. This project has every major feature you would expect from a modern e-commerce app, such as an attractive and accessible user interface, a powerful shopping cart, where customers can add, update and remove items from their cart, the ability to sort products by different criteria.

Blog App using MERN

This app will allow users to write their own stories and the data is stored in a database. The backend language used for this is node.js, express and mongoDB and the frontend being used is React

Discord-clone using NextJS and MySQL

This application is a fully functioning discord Clone using Next.js 13, React, MySQL and other various API's for various features in the project

Awards

DevTown · Front-end Web Development Certification — May 2023

Devtown's certification program offers comprehensive training in front-end technologies, including ReactJS, equipping participants with essential skills. Upon successful completion of the program and submission of individual projects, participants will receive a prestigious Microsoft Learn Student Ambassador certification.

Infosys · AI Foundation Certification — Oct. 2023

Artificial Intelligence Foundation Certification is a certification program that provides learners with a foundational understanding of artificial intelligence (AI). The program covers topics such as the history of AI, AI algorithms, AI applications, and AI ethics

Volunteering

COGNITION · Coordinator — June 2023 to July 2023
Bangalore

Developing Efficient Garbage disposal system practices by actively taking part in the segregation of dry and wet waste proposed by our government

COGNITION · Coordinator — Oct. 2023 to Nov. 2023
Bangalore

Ensuring Quality Education for government school students by providing them with anchor sheets and activity sheets designed as workbooks and teaching them how to solve those workbooks
