ARUN S ADIGA

Summary

I'm a dedicated junior Full Stack developer on a mission to translate ideas into captivating digital experiences. Proficient in HTML, CSS, JavaScript, and Java, with hands-on experience in React.js and Node.js, I specialize in crafting responsive and user-friendly interfaces. I have actively contributed to projects like Blog App, where I demonstrated my ability to integrate my front-end code with the back-end. As a continuous learner, I constantly improve my knowledge of the latest industry trends and technologies. My collaborative nature and effective communication skills make me an asset to any dynamic team. Let's connect and explore how my passion for coding can contribute to your projects!

Employment

Mr. Rocky Jagtiani
Front End Developer Intern

During this internship, I gained hands-on experience with various front-end technologies. Leveraging these skills, I developed a sophisticated e-commerce application using Next.js and successfully deployed it on Vercel.

Projects

E-commerce (E-Shop) App built with NextJS

E-commerce app made with Next 13, Sanity and Stripe. This project has every major feature you would expect from a modern e-commerce app, such as an attractive and accessible user interface, a powerful shopping cart, where customers can add, update and remove items from their cart, the ability to sort products by different criteria.

Notepad-clone built using Java Swing

This application is a Notepad Clone in which the user inputs text by writing with styles on the screen. We can Save, Print, Copy, Paste any text which we want.

Blog App using MERN

This app will allow users to write their own stories and the data is stored in a database. The backend language used for this is node.js, express and mongoDB and the frontend being used is React

Podcast Summary Application using Streamlit and AssemblyAI

This project aims to automate the process of summarizing podcasts using Assembly AI. making it convenient for users to quickly grasp the key points of lengthy audio content

Awards

Infosys Springboard · AI Foundation Certificate	Oct. 2023
Infosys Springboard · Principles of Generative AI	Mar. 2024

Volunteering

COGNITION · Coordinator
Bangalore

Ensuring Quality Education for government school students by providing them with anchor sheets and activity sheets designed as workbooks and teaching them how to solve those workbooks
